

BEES and POLLINATORS

The only city farm in Wales, Swansea Community Farm offers a variety of educational programmes themed around bees guaranteed to get all ages buzzing.

As experienced beekeepers and one of the leading outdoor education providers in Swansea, we offer a unique range of hands on, experiential courses which reconnect learners with their food, their environment, and each other.

Our education programmes (suitable for early years to KS3) provide structured full day education visits to the Farm or we can come to your school, based around sustainable issues such as food, farming, composting, habitats and protecting the environment.

Programmes include:

- An introduction to beekeeping
- Insect lifecycles
- Becoming more pollinator friendly
- Butterflies and caterpillars
- Honey and Beeswax

What the teachers say:

"Excellent trip - all the children and staff thoroughly enjoyed it. The Farm staff were excellent"

'We are lucky to have amazing school grounds but as teachers we don't always have the time to do everything. to help the children understand what's around them. The community farm have helped us pool our superpowers !

"A very valuable visit, this is our third time, we will definitely come again next year!"

'It's been great to open up our school again to parents (after Covid) and to have the help of the community farm to get everyone buzzing about the environment'

Don't take their word for it, come and give us a try!
